### Vi-Smart

Our solution for efficient, modern minibar control and more

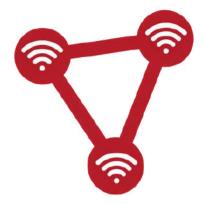

### Vi-Smart advantages

On/off control

With the on/off control, you reduce your energy costs.
Minibars are only switched on in the occupied rooms or at the guest's request.

Door opening monitoring

By monitoring whether the guest has opened the minibar doors, you reduce unnecessary checks and thus increase employee productivity.

Temperature control

The temperature control gives you secure information that the minibar is switched on and cooling.

Refill control

Refill control increases minibar sales and helps you minimize losses from non-booking beverage consumption.

# Vi-Smart Minibar On/off control

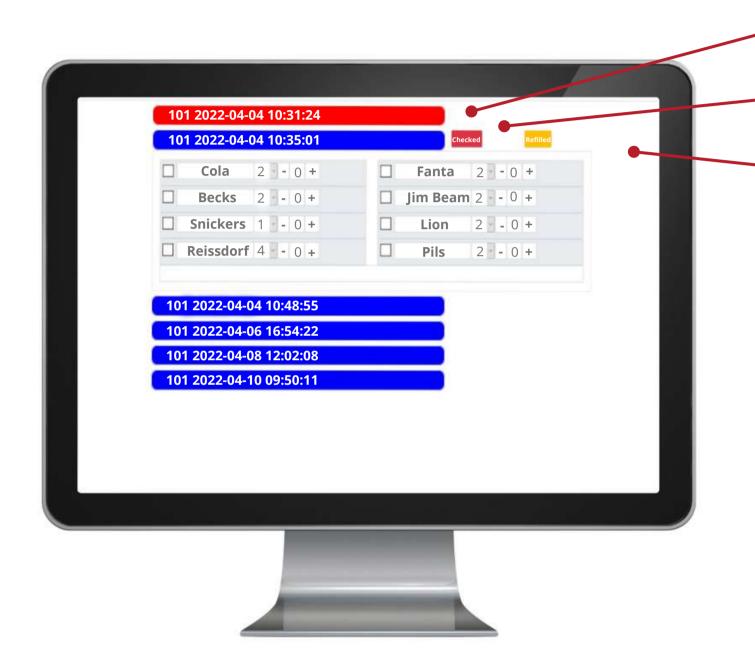

You want to reduce your energy costs and switch your minibars on and off as needed effortlessly, effectively and regardless of location?

Then Vi-Smart is the right solution for you.

#### Vi-Smart Refill control

The refill control and the On/off control is optional via PC, smartphone or tablet.

Checked
(Minibar status checked and consumption confirmed.)

Opened
(The guest has opened the door. The hotel staff has not made the refill.)

The refill is confirmed with the yellow button.

On/off control

Door opening monitoring

Temperature control

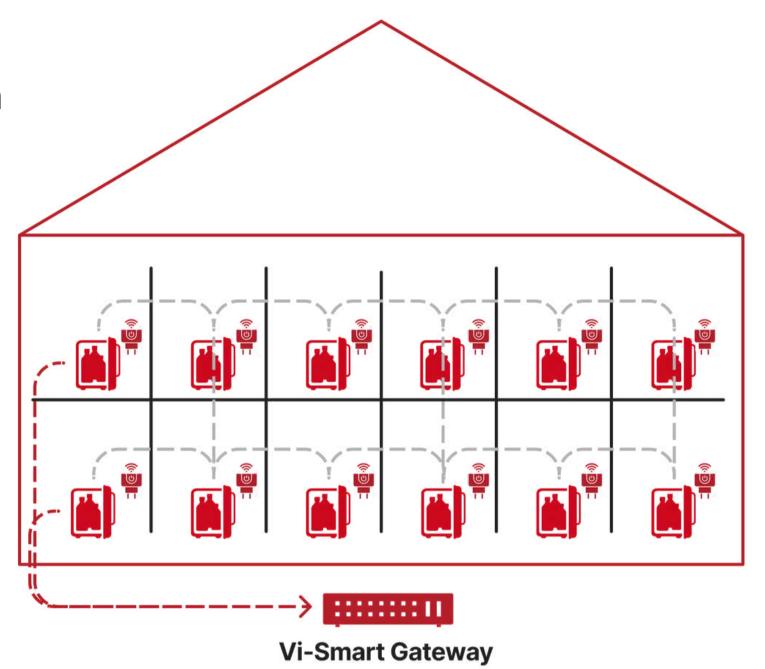

Refill control

Upgrade your existing minibars and establish a communication network between the minibars and the hotel reception.

## Technology behind Vi-Smart

- Zigbee technology offers safe data transmission through the mesh network structure.
- The Zigbee components function as transmitters and receivers thus constructing a mesh network which ensures reliable and efficient data communication.
- The Vi-Smart installation requires little effort and can be conducted during a regular guest stay.
- The basic model includes the on/off function, additional functions can be later enabled.

From planning to financing, we deliver tailor-made solutions for the technical equipment of hotels and similar facilities. We rely on our own developments and 100% on products from quality manufacturers.
